

It is bad enough that the Republican's have taken away the rights for free speech, but this is an outrage! Anyone being manipulated by these lobbyists doesn't deserve to hold office! And the voters will have the last say. The National Association of Broadcasters doesn't have the clout to fight for their own rights for free speech, why should they be allowed to influence what a paying customer has a right to listen to? No clout there, No Clout here! Keep them at bay and let paying customers have the right to hear traffic and radio on their subscription radio station.

Thank You.

Keith Berry
